

# KeyTREE

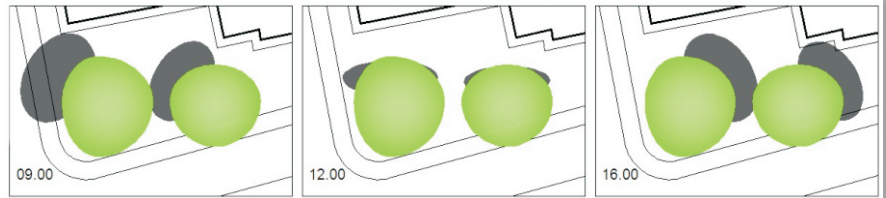

....Tree survey software for AutoCAD

**KeyTREE** is the natural choice for tree professionals using AutoCAD. There is not another established product on the market that offers the same direct attention to detail, both in terms of support and development, and meets the needs of the Profession.

**KeyTREE** not only allow you to conform to **BS5837: 2005 Trees in Relation to Construction**, but incorporates many additional features and refinements that allow you to go beyond the functionality required by the British Standard, including:

- Display tree canopies based on North, East, South and West (NESW) information
- Display tree canopies based on 8-point NESW for greater refinement of the canopy shape
- Create canopy shapes from your own surveyed or drawn polylines!
- Inherit tree properties from tree blocks provided within a surveyors drawing
- Calculate the root protection area (RPA) based on BS guidelines or user specified using your own surveyed or drawn polylines!
- Import tree survey data from Cartogoo, Google Earth (*kml/kmz*) , GPS systems (*csv*) or collected survey information held in your own spreadsheets (*xls*) and databases (*mdb, DBase*).
- Add new tree specifications information to the drawing or modify existing data
- Record and manage Tree Preservation Order (TPO) information assigned to the trees
- Provides shadow assessment, based on your location in the world, month of the year and time of day
- Schedule the drawing using predefined or customisable schedule style templates
- Export tree schedules in standard database formats
- Export tree data to Google Earth for distribution and viewing
- Exports to Eye-TREE to prepare work schedules and related tree information

Shadow Analysis

Reference	Species	Category	Easting	Northing
Ref. T21	Acer pseudoplatanus	R	1557.68E	1224.62N
Ref. T22	Fraxinus excelsior	A2	1557.00E	1219.56N
Ref. T23	Prunus avium	B2	1550.17E	1216.44N
Ref. T24	Prunus avium	B2	1552.82E	1212.74N
Ref. T25	Acer pseudoplatanus	C2	1557.44E	1213.95N

## System Features

- AutoCAD 2007, 2008, 2009, 2010 and 2011 or available as a standalone version that includes its own AutoCAD OEM engine, the world's leading CAD application
- Depending on your AutoCAD, KeyTREE is supported on Windows XP Pro, Vista and Windows 7 platforms
- Available as a complete integrated solution with KeySCAPE and KeySCAPE LT or as individual application module.
- Standalone or network versions available.
- Open architecture to allow you to customise and tailor the application to meet your specific requirements.
