

# KeySCAPE LT Elements

....Flexible CAD solution for the Landscape Industry

**KeySCAPE LT** is a professional, standalone version of our flagship product KeySCAPE but, unlike KeySCAPE, it includes its own AutoCAD (OEM) engine. It comprises an integrated range of application modules that deliver a comprehensive set of routines and utilities appropriate to meet the needs of environmental designers today.

KeySCAPE LT is available at two levels:

**LT Elements** - our entry-level application that includes high quality presentation graphics that are ideal for the production of landscape master plans and general arrangement drawings. It does not include any plant calculation, plant labeling or scheduling features. Upgrades to KeySCAPE LT Pro available, if required.

**LT Pro** - professional planting software application for 2D and simple 3D drawing production. Includes the graphic features of KeySCAPE LT Elements but allows for plant calculations, plant specification, labeling, scheduling and exports for costing.

...here are a few of the features that make **KeySCAPE Elements** the natural entry level choice for landscape professionals:

## Application Modules

- All the application modules can be purchased separately to enable the software to grow, as your business requirements grow
- All modular purchases includes first year service agreement
- Upgrades available to our Pro (professional) version

## CORE

...the "engine" needed to run the application modules, plus:

- 3D Visualisation tools
- Generate your own project Graphic libraries
- Unique, Pattern Polyline creator / manager
- Over 100 Construction details
- Over 15 complex, landscape specific linetypes

## SITE SURVEY

- Extensive, customisable symbols library appropriate for Site Appraisal, Analysis and Master Planning
- Car park design
- Sports pitch layouts
- Topological design and analysis, including level routines, fall calculations, contouring and cross-sections

## SOFTWARES

- Extensive, customisable symbols library appropriate for the production of Softworks drawings in 2D and 3D
- Unique, Softworks Edge Pattern creator / manager
- Simple Specimen, Planting Area and Hedge creation and modification features

## HARDWORKS and KeyPAVING

- Extensive, customisable symbols library
- Detailed Paving Design, including paving areas, edges and paths, all based on actual brick sizes - *not a hatch!*
- Includes radial paving and the ability to create your own random paving patterns
- Brick number calculations and product specifications
- Flexible schedule routines with exports for costing

## KeyTREE

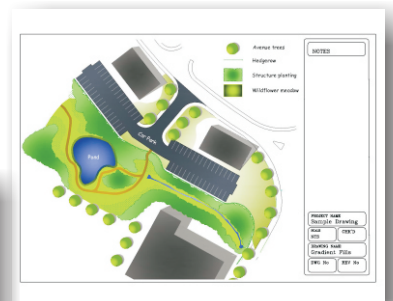

- Optional add-on module for producing tree survey plans in accordance to BS5837:2005 Trees in relation to construction

## 3D Visualisation

- Included with KeySCAPE is our Key3DBLOCKS library

## System Features

- Built on the AutoCAD OEM engine, the world's leading CAD application
- Supported on Windows XP SP2 32-bit and Vista and Windows 7 32-bit and 64-bit platforms
- Available as a complete integrated solution or as individual application modules.
- Standalone or Network versions available.
- Open architecture to allow the user to customise and tailor specific parts of the application to meet user requirements
