

KeySCAPE LT Pro

...The only established standalone CAD solution for the Landscape Industry

KeySCAPE Design Studio is the natural choice for Landscape Architects using AutoCAD. There is not another established product on the market that offers the same direct attention to detail, both in terms of support and development, and meets the needs of the Profession.

KeySCAPE LT Pro is a professional, standalone version of KeySCAPE (formerly known as KeyPLANTING) that includes its own AutoCAD (OEM) engine and comprises an integrated group of application modules, that deliver a comprehensive set of routines and utilities, appropriate to meet the challenges for environmental designers today.

...here are just a few of the many key features that make it truly the complete solution for landscape professionals:

Application Modules

- All the application modules can be purchased separately to enable the software to grow, as your business requirements grow
- All modular purchases includes first year service agreement

CORE

...the "engine" needed to run the application modules, plus:

- 3D Visualisation tools
- Generate your own project Graphic libraries
- Unique, Pattern Polyline creator / manager
- Over 100 Construction details
- Over 15 complex landscape specific linetypes

SITE SURVEY

- Tree Survey, Vegetation Survey, Hardworks Survey, all with their own Schedule routines
- Topological design and analysis, including level routines, fall calculations, contouring and cross-sections
- Site Appraisal, Analysis and Master Planning
- Car park design
- Sports pitch layouts
- Golf course design

SOFTWORKS

- Extensive, customisable symbols library
- Unique, Softworks Edge Pattern creator / manager
- Simple Specimen, Planting Area and Hedge specification dialogs for single species, mix and layered planting
- National Plant Specification compliant, plant specification database, including over 7,500 plants
- Extended links to external databases, including PlantPARTNER and Helios-CD
- Flexible schedule routines with exports for costing

HARDWORKS and KeyPAVING

- Extensive, customisable symbols library
- Detailed Paving Design, including paving areas, edges and paths, all based on actual brick sizes - *not a hatch!*
- Includes radial paving and the ability to create your own random paving patterns
- Brick number calculations and product specifications
- Flexible schedule routines with exports for costing

KeyTREE

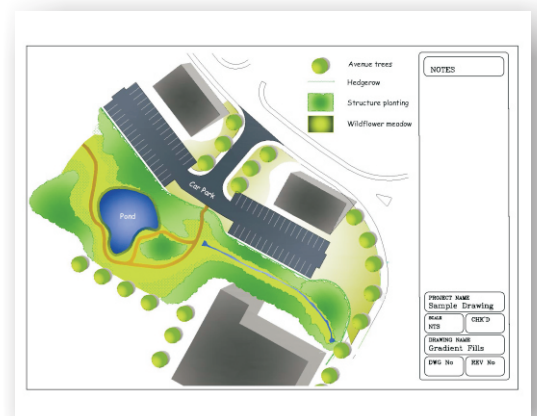

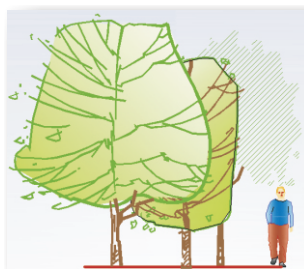

- Optional add-on module for producing tree survey plans in accordance to BS5837:2005 Trees in relation to construction

3D Visualisation

- Included with KeySCAPE is our Key3DBLOCKS

System Features

- Built on the AutoCAD OEM engine, the world's leading CAD application
- Supported on Windows XP SP2 32-bit and Vista and Windows 7 32-bit and 64-bit platforms
- Available as a complete integrated solution or as individual application modules.
- Standalone or Network versions available.
- Open architecture to allow the user to customise and tailor specific parts of the application to meet
